

SUPERMAX INDUSTRIES PVT. LTD.

We Supermax Industries P Ltd. Manufacturer and Exporter of Rubber Reclaiming Agent i.e. DiAryl Di Sulphide (DADS) in India Since 1999 which is used for rubber recycling. We are located in North India with the capacity of 125MT per month. Our Quality Standards makes our product best from other manufacturers.

We have one of the best upgraded techniques and process for the super fine quality of the product. Our team of Rubber Engineer and Chem Engineer in our R&D department are on regular checking of each and every batch. Our Laboratory having all standards equipment to check the chemicals at every step of the process, Before transferring the batch to the final section, we have a rubber cooking process to check the material. Once it passes through cooking, we pass the material for packing.

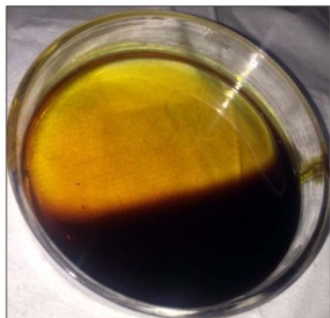

We adopt all the precautions and standards during the process, Only our Rubber Reclaiming Agent(DADS) Compliance REACH & ROHS tests. Our company certified with **9001:2008 Quality standards.**

OUR PRODUCT RANGE

1. DiAryl Di Sulphide (DADS wtr)

DADS is recommended for WTR Reclaim (Nylon based tyre). This is the best reclaiming agent from the past history of reclaiming agents to recycle the nylon rubber tyres / tubes to meet out the required standards in reclaimed rubber, Accepted by all rubber reclaimers around the globe. Dosage required 0.6% to 1.0% (Depends upon the size and fiber portion).

Flash point	90 - 110 degree Celsius (Close cup)
Viscosity	max. 150 seconds @ 30 degree cel.
Density	1.22 (±0.03) @ 30 degree cel.
Heat loss	2% (±0.5) @ 105 degree cel. for 1hr.
Ph value	7 (±0.5)
Appearance	Dark Brown Liquid with characteristic smell.
Packaging	200kgs net weight in MS drums.
Dosage recommended for nylon based tyre crumb	0.6% to 0.85% (depends upon crumb/fiber/autoclave pressure/process)

2. DiAryl Di Sulphide (DADS butyl)

DADS butyl is recommended for butyl reclaim, We process this chemical through special process in high temperatures to meet out the standards for butyl reclaim. Our DADS butyl always be in demand of butyl reclaimers. Dosage recommended 0.2% to 0.3%.

DADS butyl can also be used in chloro butyl reclaim, Dosage recommended 0.6% to 0.8%.

3. Super DADS

Super DADS is an Odorless thick, dark and strong chemical recommended for reclaim synthetic rubber or Radial tires. Every Reclaimer having their own dosage system 0.6% to 1% . Some reclaimers use this chemical in WTR also for cost cutting with 0.3% to 0.4% dosage. but we recommend this chemical for synthetic rubber only.

Freezing pt	30 (±3) degree cel.
Softening point	67 (±3) degree cel.
Density	1.22 (±0.02) @ 120 degree cel.
Ph	3 (±1)
Appearance	Solid Black with characteristic smell.
Packaging	200Kgs net weight in MS drums.
Dosage recommended For Radial tyre crumb or synthetic	0.3% to 0.6% (depends upon rubber powder)

We supply our material with Full Guarantee in the markets, as material passed with so many tests before dispatch. If anyone having some special type of crumb rubber, we can make chemical accordingly and can supply with assured results.
